SEASON	STAGE	MARKETS	TARGET

THE PROPOSITION

An Italian championship season run by a driver who works in two markets — **Italy and the United States** — and a paddock your clients can actually stand in.

The bridge. Six years racing and studying in the United States, a Sports Communication degree from the University of Kentucky, now based in Cremona. For a partner on either side of the Atlantic, that is the asset; the racing is the platform.

THE PROGRAM

2027
The Foundation season

Closed-wheel, Italy. A full championship season.

›

2028
The Proving season

Production-based GT racing in Italy, unlocked by 2027 partners and results.

›

2029–30
Professional GT

Top-level GT racing in Italy and Europe, earned through partnerships and results.

A full season to rebuild race craft, then one step a season. **No jump is bigger than the last one earned.**

WHAT A PARTNER GETS

Access first. What a business gets from motorsport is not a logo — it is a place to bring a client: paddock and garage access on a race weekend.

Four entries, one class win: a short record, printed straight.

THE RESET

2025
The year he chose not to spend.

A season's budget declined rather than spent on a year he wasn't ready to convert. Sim training only. In March 2026 he tested a MitJet closed-wheel car; it went well, and it opened the relationship that shapes 2027.
